**reKVR**- is the newest generation of an aquatic harvester. **reKVR** manufactured from aluminum, allowing it to be lite, durable, and requires low operation maintenance. It can operate in a 10-inch draft and carry more than 2000lbs of product. **reKVR** utilizes its advanced hydraulics system for daily operations and a proven Kohler engine for its powerplant. It has inset aluminum paddle wheels, allowing the **reKVR** to maneuver close to docks and shorelines for efficient water cleanup. **reKVR** can lower its cutting head down approximately 4 ft, allowing the cutting edges to harvest while utilizing the rear conveyor for an effective offloading. **reKVR** is built to be operated by a single operator from trailering to harvesting, allowing a low operation cost. **reKVR** is made and assembled in America.

- Width: 86"
- Length: 211"
- Height: 80"
- Weight: approximately 2200 LBS
- Cutting head depth: 48"
- Eaton Hydraulics, 3-year warranty
- 15-gallon aluminum hydraulic reservoir, using biodegradable and USF&W approved hydraulic fluid
- Hydrogear paddlewheel propulsion, 2-year warranty
- Kohler PA-ECH730-3006, Kohler engines warranty
  - ❖ Horsepower: 23
  - ❖ Cooling: Air
  - ❖ Fuel Type: Gasoline/(optional) HP Propane

**Trailer:** Custom built for easy load and unload of the *re KVR*.

- Width: 96"
- Length: 22'
- Weight: 800 Lbs.
- Ball size: 2 <sup>5</sup>/<sub>16</sub> "
  - ❖ Aluminum Turf Trailer: Trailer manufactured with aluminum instead of steel and adding turf tires, making it lite for sensitive grass areas.

**Tower Canopy:** 40" wide collapsible canopy gives you protective shade and keeps you comfortably cool when working on the water.

- Shade rotates 180°
- Sturdy Frame: Zinc-plated steel frame resists corrosion for added durability
- Rain Protection: Canvas canopy is water-resistant to keep you dry in wet weather

**Lights:** Adds two light bars (front and rear facing) that are marine grade lights and a larger battery for more power allowing operations in low lighted areas.

**Stainless Steel Belting:** Upgrading the standard galvanized conveyer belt to stainless steel.

**Sound Reducer Enclosure:** Sound reducing material is placed around the engine allowing quieter operations.

**Herbicide Application Spray Kit:** A polyethylene tank with a 12-volt diaphragm pump can pump up to 2.1 gpm. Spray nozzles are added to the cutting head, allowing for herbicide spraying while operating the **reKVR**.
